

Kalkidan Binyam

Software Developer — Front-End & Full-Stack
kalkidanbinyam83@gmail.com | +251 946 648 028 | Addis Ababa, Ayertena | [linkedin.com/in/kalkidan-binyam-8a46a5384](https://www.linkedin.com/in/kalkidan-binyam-8a46a5384) | github.com/qalindan

SUMMARY

Motivated Front-End & Full-Stack Developer with a strong track record of building responsive, scalable web applications. Proficient in modern front-end technologies including Next.js, TypeScript, Node.js, and Tailwind CSS. Experienced in engineering complex requirements into fully functional, high-performance applications with a focus on robust architecture, state management, and clean code. Demonstrated expertise in leading Figma design projects, including comprehensive UI/UX wireframing for the SuqFlow POS, food delivery platforms, and e-commerce solutions, translating design systems seamlessly into production-ready web and mobile interfaces.

SKILLS

- Languages: JavaScript, TypeScript, Python
- Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3, Framer Motion, Redux, Material UI
- Backend & Integration: Node.js, REST API Development, Firebase, Database Integration, PostgreSQL, Prisma, Django, FastAPI
- Design & Workflows: Figma, Git, GitHub, VS Code, PowerShell, Docker, Expo

EXPERIENCE

Mid-Level Full Stack Engineer | Aug 2026 – Present

Afterquery | Remote

- Architected, developed, and deployed highly scalable full-stack features from the ground up, successfully bridging complex backend data processing logic with highly responsive, interactive front-end interfaces.
- Proactively identified bottlenecks and optimized complex relational database queries alongside API endpoints, significantly improving application load times and enhancing overall system performance under heavy user loads.
- Collaborated closely with cross-functional product managers and design teams to ensure technical execution matched the project vision and strict deployment timelines.

3D Dev Assist | Sep 2026 – Present

Revelo | Remote

- Managed and streamlined the comprehensive onboarding setup, Discord channel integrations, and agile workflow structuring for a diverse portfolio of emerging 3D asset development projects.
- Played a pivotal role in the complex rendering, seamless integration, and rigorous performance optimization of interactive 3D web environments tailored for high-fidelity browser experiences.
- Reduced critical asset load times by expertly compressing high-resolution textures, streamlining 3D components for optimal web performance, and troubleshooting persistent cross-browser rendering anomalies.

Software Developer and UI/UX designer | 2024 – 2026

Kasma Digitalis | Addis Ababa, Ethiopia

- Engineered and maintained robust web applications utilizing modern JavaScript and TypeScript frameworks to deliver highly interactive user experiences.
- Collaborated with cross-functional teams to integrate backend APIs with responsive frontend interfaces.
- Streamlined development workflows and version control processes using Git, ensuring efficient project scaffolding and repository management.

Software Engineer Intern | Aug 2026

EagleLion System Technology | Addis Ababa, Ethiopia

- Spearheaded the end-to-end development lifecycle of the Suq Flow (ህሊክቶ) retail bookkeeping and point-of-sale platform, driving the project seamlessly from the initial PRD drafting through to successful production deployment.
- Architected, designed, and engineered the core financial management, inventory tracking, and bookkeeping toolsets, intentionally streamlining the application scope to ensure a highly stable baseline system focused strictly on essential retail operations without unnecessary feature bloat.
- Created comprehensive, pixel-perfect UI/UX wireframes in Figma and built out the modular frontend components, responsive mobile interfaces, and robust backend API routes to guarantee flawless cross-platform synchronization.

Frontend Developer Intern | 2025

Nova Technology | Addis Ababa, Ethiopia

- Integrated backend APIs with user interfaces to deliver dynamic data and functionalities to end-users.
- Developed responsive interfaces using React, Next.js, and Tailwind CSS, focusing on mobile-first design principles.
- Implemented reusable UI components to improve overall development efficiency and codebase maintainability.

Backend Developer Intern | 2024

Kegeberew Technology | Addis Ababa, Ethiopia

- Developed backend APIs using Python and JavaScript to support dynamic frontend applications.
- Implemented efficient database queries and optimized data processing workflows.
- Assisted in building RESTful services and debugging application performance alongside the core development team.

EDUCATION

BSc, Computer Science | 2021 – 2026

Adama Science and Technology University | Addis Ababa, Ethiopia

- GPA: 3.05/4.0
- Relevant coursework: Web Development, Software Engineering, Database Systems, Data Structures and Algorithms, Operating Systems.
